

Employee Certification Management

Remove the safety and quality risk created by workers with missing or expired certifications. The easy-to-use software from Sospes helps ensure worker certifications and credentials are up-to-date. It also provides workers with self-service access to their credentials from any computer, smart phone or tablet. The system proactively alerts employees, supervisors and training managers when certifications are approaching expiration. These risk control efforts could even give you the edge over competitors.

Real-time Certification Status Reporting

6

Employees with clear certification status

0

Employees with certifications expiring soon

2

Employees with expired certifications

CENTRALIZED MANAGEMENT

No more paperwork. Centralized data management keeps administrative workload to a minimum.

ANYTIME, ANYWHERE ACCESS

Safety Managers, Training Managers, and Employees can all access critical certification and credential data anytime, anywhere, from any device.

AUTOMATED NOTIFICATIONS

Managers and employees are automatically notified and reminded of upcoming and expired certifications.

EASY REPORTING

Instantaneously understand the certification status of your organization.
